Gary, thanks for the proposed schedule, I see the FS is due soon and I am looking forward to reviewing a hard copy of the FS when available. What I am confused on is how the 3 phase (hydro, solids transport, chemical) modeling effort that was initiated fits into any activity on the schedule, since it does not appear. Seemingly, it is part of the FS, as the modeling results would define risk and cleanup levels, as well as predict remediation performance?

Subject: FW: San Jacinto River Waste Pits Superfund Site Letters

David,

EPA approves the attached schedule for the San Jacinto River Waste Pits Site. The draft Feasibility Study will now be due by 8/30/2013.

Regards,

Gary Miller
